I have been inside your war zone  
And I've seen you drop your poison  
You compromise the steal  
Telling people how you feel  
Though it's not a bit for real  
But the dollar, it gives you wills

And you're longing to be free  
But no one brings me down like me  
No one brings me down like me

Have you heard when greed meets hunger  
How absurd the weak is stronger?  
'Cause when they are satisfied  
They sigh and wipe their mouth  
And they sleep till they awake  
But for you there's too much at stake

You have to plan the next big break  
You rest when you are dead like me  
Rest when you are dead like me  
Down like me, down like me

No one brings me down, down, down  
Down like me  
No one brings me down, down, down  
Down like me

No one brings me down, down, down  
Down like me  
No one brings me down, down, down  
Down like me  
No one brings me down, down, down  
Down like me
