When I saw you standing in the background  
Soon I realized it's been a long time  
But now I don't care 'cause nobody's there

I was looking for something with a meaning  
I've been waiting for so long and I'm bleeding  
And I don't even care 'cause nobody's there

You don't know how I feel  
Nobody ever told you  
I don't regret and you won't forget

Do you still remember the days  
When everything was right

Hard to believe it hard to believe it now

I've been waiting for such a long time  
And I don't even care 'cause nobody's there

You don't know how I feel  
Nobody ever told you  
I don't regret and you won't forget  
Do you still remember the days  
When everything was right
