So you think you've seen it all? But this is not the end.
More pain lay ahead. Evil breeds everywhere. you can't
Escape it's grasp. You can only fight it. Live each day
With a killer instinct. But your shields will fall. It
Will rip into you like you're not shit. Attempting to

Dissect your heart from your chest. Now here lies the
True test. Will you let it destroy you or will you race
The fire and hold on tight? Face the facts and build on
It. Never let it win. Adversity introduces man to
Himself!
