Love relief me, give me shelter  
Let me grab my arms around you  
And give me whisper, let's not argue  
Don't wanna lose you yet

Could we not just, sleep on tis first  
Won't you give me one more night now  
Maybe that's postponing  
The unavoidable but  
Don't wanna lose you yet  
Well, I fear we're going down dear  
And how am I supposed to  
Make you ever make you change your mind back  
When you're all set to go

I know this won't last much longer but  
Don't wanna lose you yet

Oooohh

I wanna feel you  
Come closer  
But I do not claim to know  
Oh how to save us from going under  
Just when I need you most

It took me so long  
To finally win you  
Don't wanna lose you yet, mmmm  
Don't wanna lose you yet, no  
Don't wanna lose  
You yet
