### "Feel You"

Visit "[Feel You](#)" on [MotoLyrics.com](http://MotoLyrics.com)

I travel through the years  
I try to cope with all my fears  
And wander through this time and space  
But never do I find my place

Float through this galaxy  
With all the thoughts that anchor me  
My riches, oh, I surely would  
Trade them if I only could

Feel you  
I wish I could feel you

I travel round the sun  
I turn my back on everyone  
I wish there'd only be a way  
To find some place I'd wanna stay

Of all my sorrow and distress  
I mostly fear the emptiness  
And no one's ever understood  
And how we'd wish we only could

Feel you  
I wish I could feel you  
I wish I could feel you  
I wish I could feel you

Give me some place to hide in  
No shifting sands or skies on fire  
Give me some place to hide in  
No closing walls, but just a light to light the way

Feel you  
I wish I could feel you  
I wish I could feel you  
I wish I could feel you  
I wish I could
