It's good to see you
It's been a while
You've had your life
And I've had mine

It's good to notice
All the ways we change
But even better
How we stay the same

I'd love to know
So tell me everything
I want to know exactly how you've been
Before you know
We'll forget the time
And turn around and find we've talked all night
It's getting light outside

Even though I could talk all day
I still run out of things to say
I feel fine in your company

Even when we sit silently
And suddenly
We'll turn around and find we've talked all night
It's getting light outside

The conversation goes so easily
And that's exactly how it needs to be
I know when I speak I'm listened to
And in return I do the same for you
I don't feel the need to reminisce
Don't want to think about the things I miss
Before you know we'll forget the time
And turn around and find we've talked all night
It's getting light outside
