

16 Volt "Crush"

Visit "[Crush](#)" on MotoLyrics.com

Drown me in this feeling, celestial overload
Main line rush right through me
Let it slip inside, wash the fear away
Scratch right through what I need

Reasons even I know
Like the moments left behind you
Like the places you have been to
You're left realling from the let down yeah

Tired of this feeling, a shadow I can't shape
It's courses run right through me
Burning up inside, crush like overdrive
It figures out what i need

Reasons even I know
Like the moments left behind you
Like the places you have been to
You're left realling from the let down yeah

Crush

("A let down crush" ~over and over again in
background of chorus~)

Reasons even I know
Like the moments left behind you
Like the places you have been to
You're left realling from the let down

Reasons even I know
Like the moments left behind you
Like the places you have been to
You're left realling from the let down yeah
