Is this what I trained my heart  
Do you like to play this game  
Lost reality will come down soon  
Ending what I had begun

All those things you left behind  
Can you have friends and work at the same time  
Can you be alone with your mind  
Is this what I want

Nobody understands  
I am locked inside my head  
It all looks so different now  
But I know it's all the same

All those things you left behind  
Can you have friends and work at the same time  
Can you be alone with your mind  
Is this what I trained my heart

Do you know, who I am  
Do you feel, do you understand

Shame on us  
Shame on you...

I gave you all that you want  
But you don't see to understand  
You all don't get the point  
You all don't get the point

Do you know, who I am  
Do you feel, do you understand
