"System Failure"

Visit "[System Failure](#)" on MotoLyrics.com

This world is being controlled by fools
That fill your life with pain, these fools
They burn your skin with acid rain
Here again

Begging someone, begging something
Please help us to find our way back
To find our home
Please hold on

To that something known as hope
To find your way back
To find your home

No matter what they say
You're not the one to blame
I feel the same way
They entrust you all this pain
Still keep yourself sane
No matter how hard they try
You will try harder to stay alive
No more pain
The dawn of a new nation
