Girl, I think you really know me  
But you're afraid to trust me  
Stop doubting my intentions  
Why, why don't you believe me  
There must be something  
You don't wanna mention

I said I'll shouted from the mountain top  
My neverending love  
That's what you've got

When the sun don't shine  
And the moon won't glow  
When the rain don't fall  
When the wind don't blow  
When the earth won't spin  
And it's standing still  
That's when I'll be gone

I ain't going nowhere  
Not if you won't be there  
I ain't going nowhere without you

You, you're my inspiration  
The only motivation  
I have ever needed  
Dreams, you know I've got one baby  
You and me forever  
Let me just repeat it

I told you can always count on me  
What can I do  
To put your mind at ease

When the sun don't shine  
And the moon won't glow  
When the rain don't fall  
When the wind don't blow  
When the earth won't spin  
And it's standing still  
That's when I'll be gone

When the rivers dry  
And the oceans part  
When there's not one beat in a single heart  
That's when I will stop, (stop)  
Stop loving you  
That's when I'll be gone

I ain't going nowhere  
Not if you won't be there  
I ain't going nowhere without you

When the stars disappear  
That's when I won't be near  
I knew the day I saw you  
I'd always be there for you  
Make no mistake  
Baby, love is here

When the sun don't shine  
And the moon won't glow  
When the rain don't fall  
When the wind don't blow  
That's when I will stop, stop  
Stop loving you  
That's when I'll be gone

When the rivers dry  
And the oceans part  
When there's not one beat in a single heart  
That's when I will stop, stop  
Stop loving you  
That's when I'll be gone
