When I was young I wallowed in none  
You know none is no way to be  
You must go for all  
Go for all and all will set you free

If you continue to wallow noneconscious and hollow  
Nonetheless go for all and allness will follow  
All like gravity, is there all the time?  
Applehead Newton was a figment of mind

Run far and wide but you can't hide  
We're all we got no sense of pride  
All won't exercise undue force  
Or engage in somenatious intercourse

Allulations to the all worthy  
All is all you need  
It's the fifth primary color

It's the number between zero and infinity  
Some would have you settle for itself  
When all is in your grasp

When I was young I wallowed in none  
You know none is no way to be  
Now I go for all  
Go for all and all will set you free

Don't mistake all for love or hate  
It's not like any other mental state  
It's the total extent when nothing else remains  
The utmost possible of possible gains

There'll be no selfishness, evil or greed  
All don't care about your race or creed  
All is all you have to do  
'Cause anything else would be A.U.

Allulations to the all worthy  
All is all you need  
It's the fifth primary color

It's the number between zero and infinity  
Some would have you settle for itself  
When all is in your grasp

I was a non entity once  
Then I receive a revallation  
It made me re evaluate my way of life  
I allivated my outlook

Some said I had allterior motives  
They were right  
My life started all over again  
It's all up to you but are you up to all?

Ye must quest all  
Lest ye become some full  
Or something of a none skull  
Saying something that is nonsense
