I get up in the morning
But mostly in the afternoon
The sun gets up too early
The moon goes down too soon

What can I expect from the day ahead?
Maybe I'll just sleep instead, no escaping it

Sunrise, who owns your time?
9-5 for life

What can I expect from the years ahead?

I get up in the morning
But mostly in the afternoon
The sun gets up too early
The moon goes down too soon

If you would go away. I could sleep all day
But up is where I have to get, no escaping it.
