I recognize the pieces but
I don't know where they fit.

to analyze the universe to bits.
I know exactly just enough
I know all there is to know
I'm all messed up, nowhere to go.
about nothing at all.

Ask me my address I can't recall.
It's my fault.

I don't know.
I'm an educated idiot.
I'm smart enough to know

I know how an engine works
I know where Old Zealand is
I don't know how to drive.
but I barely know my left feet from my right.

I'm not sure if I fit.
I recognize the species but
to analyze the universe to bits.
I quit.
We know exactly just enough
smart enough to know

an educated idiot
I'm an educated idiot
sure is good to know
I'm not alone.
