There is no place like  
Just for love  
Just understand that  
Just for love

Come with me  
Just for love  
It was you that I thought of  
Just for love

The stars are calling you  
And you've never been so luminescent  
The city calls for you  
And you've never been so luminescent

Just for love  
Just for love  
Just for love  
Just for love

Me the [Incomprehensible], you the [Incomprehensible]  
now  
With every move now  
I'm the mover with the groove now

Just for love  
Just for love

The stars spin for you  
And you've never been so luminescent  
The city calls for you  
And you've never been so luminescent

Just for love  
Just for love  
Just for love  
Just for love
