You seem so far away while
You're playing your little game
You make the perfect moves, baby,
You fit so nicely in this little frame

Same old place but you don't recognize a face
Come with me baby, you will feel safe
And while the city's asleep let's meet
Int the B suite
While the city's asleep let's meet
Int the B suite

Placing your bets high
In the same old mistakes
It's too much to handle and
How much more can you take

You sure got it goin'
But before you lose
There is still a chance for you to choose
Why won't you come and take the heat
In the B suite

You sure got it goin'
But before you lose
There is still a chance for you to choose
Why won't you come and take the heat
In the B suite

hmmm... In the B suite
