I realize that all of you watch tv and read newspapers
And are shiny new, well adjusted civilians, but all I
Really see is a parade of grey citizens supporting a two-

Point bloodthirsty plan set to the sounds of brains
Splattering on walls and fingers tooling around in

Freshly severed sockets and the faint humming of
someone

Gurgling skull fragments in another part of the house!
This practice runs on electricity, gas, deadly fluids,
And urine! and apparently burns clean enough to clear
Your fucking conscience.
