I'm going to take you down  
This down before you take me down.  
I'm going to erase you  
This time before you erase me.

Now the roles have been change,  
You're not the winner.  
My quietness has been ended,  
You're going to get vanished.

You are the most dangerous creature in the world  
You'll be killed by those who you harmed  
Knowing that you can't make it, still you'll try to run  
While giving away your last breath, you'll be begging to all of us

Come and save me my saving angel  
I'm going to be waiting for death on your arms when you come  
I'll erase all the bad memories by the time  
I'm bleeding and going to die without you.

You are the most dangerous creature in the world  
You'll be killed by those who you harmed  
Knowing that you can't make it, still you'll try to run  
While giving away your last breath, you'll be begging to all of us

Come and save me my saving angel  
I'm going to be waiting for death on your arms when you come  
I'll erase all the bad memories by the time  
I'm bleeding and going to die without you.

I'm going to come to field,  
I'm gonna die and walk my soul around while everyone's watching

This is war!  
This is love!  
The final round
