I feel very different from the last days
For you lost all the darkness wars of the past
You never see sunlight in poison for the fight
Silent all night now, for the dark day

He died for you
I'm in hell
This time for you
Demon fest
I will find you
This is the best
Revenge for me
Blood and respect

Do not come to appear in front of my eyes
The brightness that creates as the real savior angel
My body shall not enter into such
My skin can not handle such.

You can't go quietly, whether in memories
Others, such as can't, should not be
Can burn should be noted Alone in the fire
Obviously I've lost the war give me more pain

He died for you
I'm in hell
This time for you
Demon fest
I will find you
This is the best
Revenge for me
Blood and respect

Do not come to appear in front of my eyes
The brightness that creates as the real savior angel
My body shall not enter into such
My skin can not handle such.
