In a true kind of way there's a new kind of something  
Between your eyes and mine  
If you see what I'm saying and there is what I'm  
thinking  
Well love was there to find  
Come with me, there's a world here to see  
Open heartedly

In a true kind of way there's a new light that's  
brighter  
Between your skin and mine  
And it helps me forget what I tend  
I tend to remember, it helps me draw the line  
Come with me, there's a world here to see  
Open heartedly  
Come with me, come to see what I see  
It's just you and me

Do you feel the sunshine and the breeze  
Will you watch the flight of birds and ...

I know there's nothing more you need

In a true kind of way there's a new kind of something  
Between your eyes and mine  
And the right and the wrong for a day or a reason  
The making of the night  
Come with me, there's a world here to see  
Open heartedly  
Come with me, come to see what I see  
Come walk weightlessly  
Come with me, there's a world here to see  
Open heartedly  
Open heartedly

In a true kind of way there's a new kind of something  
Between your eyes and mine
