"Computer Brains"

Visit "Computer Brains" on MotoLyrics.com

Everything that you do and see, one more event in your memory
Every bit takes another bite without control over wrong or right
You must screen every entry made, the consequences must be weighed
The only way to security is every thought in captivity

Computer brains, put garbage in
Computer brains, get garbage out
Computer brains, programming you
Computer brains, what can you do?
Break out, break out, break out

Are you a user or being used, has your memory been abused?
Take random samples from your mind and analyze what you may find

Computer brains, put garbage in
Computer brains, get garbage out
Computer brains, programming you
Computer brains, what can you do?
Break out, break out, break out, break out, break out
Break out, break out, break out

Computer brains, put garbage in
Computer brains, get garbage out
Computer brains, programming you
Computer brains, what can you do?
Break out, break out, break out

You can clear all your memory and be transformed when you find the key
Think on the things that will bring you peace
Confusing data soon will cease

Computer brains, put garbage in
Computer brains, get garbage out
Computer brains, programming you
Computer brains, what can you do?
Break out, break out, break out

Break out, break out, break out
Break out, break out, break out, break out, break out
