We got a love that's futuristic
futuristic
We got a love that's futuristic
futuristic

You got that kind of lovin'
that kind that make me wantchya
Girl I'd do anything
if you walking right next to me
shooting stars are way out there
baby, we can go anywhere
Don't get me wrong now
just gon sing my song now
yeah, my video phone now
a hover ride, pick you up, we alone now
business as usual
see this earth, just don't seem suitable
we can make our own atmosphere
something real beautiful
see we were making do before
yeah, we ain't gotta do that no more

We got a love that's futuristic
futuristic
We got a love that's futuristic
futuristic

We already believe in fantasy
and it don't take no convincing me
we got a long lasting love inevitably
we'll even last through the cosmos

BRIDGE

take a journey with me
so we can live in it together
and there's possibilities
proof we're here forever
It's real to me, baby
no it's not a dream
this is something special, luv
I'm sucka for a happy ending
(sucka)

slick and new beginning
over and over and over and over
under canopy made of stars
you caress me
undressed we, won't say much
busy in each other's arms
blueberry nights and after alarm
futuristic
futuristic

love that's futuristic
futuristic
(i don't think they understand)
(they don't know and I don't care...futuristic)

We got a love that's futuristic
futuristic
(centuries long, yeah)
(I ain't going no where)
(I ain't going no where, baby)
(I ain't going no where, baby)

I gotta stay by your side
(by your side, baby baby)
baby won't you come on
(won't you come on over, baby)
we gonna be alright
(we gonna be alright)
we'll glow a spot in the light
(spot at the light)
and we'll go way past the sky

futuristic
yeah yeah yeah yeah yeah yeah yeah yeah

yeah, peven everett
you know how I do it, un hun
you know how I bring it
yeah, keep it coming
