One more death defying trick up your sleeve
Can you made it disappear
Turn a skeptic into one who believes
Until i'm im the clear

Help me i'm falling Help me i'm falling down
Help me i'm falling Help me i'm falling down

All the vox humana echoing
Crying all at once out loud
Through the madness can you still hear me
And pull me from the crowed

Help me i'm falling Help me i'm falling down
Help me i'm falling Help me i'm falling down

Everything is rising past me
Take my hand you've got to catch me
Can you make it all disappear
