If it doesn't have to happen,
Why not make the sky fall down and turn green?
The edges overlapping,
And now the police are asking me,

What did I see that night?
With free choice there comes free will,
A long lullaby and a man full of pills,
Rainchecks drying on an empty hill.

I could have been asleep and I was
Falling in too deep for the snow.

A face of hypocrisy,
Snap the tape and change the scene,
Dreaming of leprosy,
I'll make it sparkle, handful of scream,

What did I see that night?
With free choice there comes free will,
A long lullaby and a man full of pills,
Rainchecks drying on an empty hill.

I could have been asleep and I was
Falling in too deep for the snow.

Snowmen sirens, people crying,
Crystals forming for me,
A single silence, children sliding,
Bad water flowing into the stream. [repeated till end]
