"By Myself"

Visit "[By Myself](#)" on MotoLyrics.com

Cornered at a costume ball
By a handful of disguises
So I tried them all on
And they were all the right sizes
I wore them obviously
Though they would choke the life from me

I got here by myself
But I know that I will never leave the same way
I got here by myself
But how many more will I have led astray

I work the floor in search of someone
Who would give me half a chance
I know if I look hard enough
I'll always find someone who'll dance

I got here by myself
But I know that I will never leave the same way
I got here by myself
But how many more will I have led astray

It's not long before I notice
There are no doors to be seen
I can see I'm going nowhere
Somewhere that I've already been

I got here by myself
But I know that I will never leave the same way
I got here by myself
But how many more will I have led astray

I got here by myself
But I know that I will never leave the same way
I got here by myself
But how many more will I have led astray
