

Count Me Out "What We Built"

Visit "[What We Built](#)" on MotoLyrics.com

We're tearing down all that we built with all our shallow
ways
With no care for each other or the progress that we
made
We've got to hold together to make these moments last
Our concern for change is fading fast
Talking shit on each other
We're caught up in lies
Searching for fault in each other's lives
We're too blind to see what's in front of our eyes
We're destroying what we built through time
What we built with time
When will we realize what's looking in our eyes
We're destroying what we built through time
Built through time

It's up to us to change our ways
We're all at fault
We're all to blame
No one's better, we're the same
It's time to give back what we've taken away
Divided by hate we distance ourselves
With no concern for anyone else
We got to stand back to back to make this last
Talking shit on each other
Still caught up in lies and
Searching for fault in each other's lives
We're too blind to see what's in front of our eyes
We're destroying what we built through time
We're tearing down all that we built
