Cause I know what you said when you walked away
And in this day all my love
Oh how I wish to turn back those days
And now your so far away
And now I am looking out the door.
Waiting for you to come
Cause I can't wait for you no more, look inside then.
You know cause I can love you again
If you'll love me.
You know cause I can love you again
But if you'll love me.
I need you more (x3)
Oh baby I need you more (x 2)
Let just start, a better life with you apart
I can know that my heart
It could be forever in love
