We got the green light, nothing's in the way  
The TVs on and the bombing stars today  
We got the green light, nothing's in the way  
The TVs on and the bombing stars today

Sitting here but it isn't clear  
Does it make much sense to you?  
Once again pounded in our heads,  
And there's nothing we can do  
Images of a hundred things,  
Neatly edited and sold,  
Tried to find just one ounce of truth,  
And it's ass out, in the cold

We got the green light, nothing's in the way  
The TVs on and the bombing stars today  
We got the green light, nothing's in the way  
The TVs on and the bombing stars today

Talking heads, tell a story,  
See if we can catch the spin,  
So good at painting pictures when will  
This shit ever end?  
A curve is thrown by a source, unknown,  
Journalism at it's worst  
A race to see who makes history,  
And who will make it first

We got the green light, nothing's in the way  
The TVs on and the bombing stars today  
We got the green light, nothing's in the way  
The TVs on and the bombing stars today
