Go! seems like the dark clouds have faded and all that frustration is gone. i waited and waited for something to come move this bad thing along. now i know that i'm good to go. i can move far ahead. with this weight lifted off of me i can get out of bed. go! days that feel so thick and heavy. they'll always come and they'll go. it's best to get up and get something done, even if things start up slow. now i know that i'm good to go. i can move far ahead. with this weight lifted off of me i can get out of bed. now i know that i'm good to go. i can move far ahead. with this weight lifted off of me i can get out of bed.
