Hey buddy, what's your deal?
It's been a long week
Yeah, I know how you feel

You're thinking life's crazy
But you're not alone
Just look around everybody's here
Got a story of their own

Time to just play it up
And Debbie's get hitched
And the boss of mine

I'll tell you he's a son of a
Which brings us back you
You know it's gonna be alright

'Cause we're gonna take a little trip tonight
And go down let's go down
We're gonna make a little run to Tequila Town

May take a bottle or a shot or two
How long you stay we'll, it's up to you
No, don't need a plane, a train or car

You can get there from everywhere, anywhere you are
One little party or a pick me up
Just go down, down, down to Tequila Town

There's a little place I sometimes go
To celebrate or if I'm feeling low
Come along with me now what do you say
A little salt and lime we'll be on our way

Let's go down, let's go down
We're gonna make a little run to tequila town
May take a bottle or a shot or two

How long you stay well it's up to you
No, don't need a plane, a train or a car

You can get there from everywhere, anywhere you are

One little party or a pick me up
Just go down, down, down to Tequila Town

Well, I know it's temporary fix
But in times like this it really does the trick

Let's go down, let's go down
Let's go down' let's go down
We're gonna make a little run to Tequila Town

May take a bottle or a shot or two
How long you stay well, it's up to you
No, don't need a plane, a train or a car

You can get there from everywhere, anywhere you are
One little party or a pick me up
Just go down, down, down, everybody now
Down, down, down to Tequila Town

Go down let's go down
Let's go down, let's go down
We're gonna make a little run to Tequila Town

Go down let's go down
Let's go down, let's go down
We're gonna make a little run to Tequila Town
