"I Loved Everything"

Visit "[I Loved Everything](#)" on MotoLyrics.com

I loved everything about you
I even loved the things I never loved about you
I loved everything about you

I loved, the thing I loved about you
I even loved the stuff I never loved about you, baby
I loved everything about you

Car's a wreck and the yard's a mess
There's a thread hangin' off, of your favorite dress
Baby, baby, I love that dress
Washin' dogs, killin' fleas

I'm not gonna ask how you scraped both knees?
Baby, baby, you've been on your knees
I know what it's like girl I've been there, too

I loved everything about you
I even loved the things I never loved about you
I loved everything about you
I loved, the thing I loved about you
I even loved the stuff I never loved about you, baby
I loved everything about you

There's no space between us
There's no space between us
There's no space between us

Baby, baby, you were made of steel
It makes this trip a little more unreal
Baby, I loved you, loved you, I loved you so much

I loved, the thing I loved about you
I even loved the things I never loved about you
I loved everything about you
I loved everything about you

I even loved the stuff I never loved about you, baby
I even loved the things I never loved about you, baby
You know I did, I loved everything
