We met, we loved, we laughed, we cried
You went away, and my love should have died
But I still feel myself holding your hands
And laughing at the little things that most folks don't understand

I just can't forget about you baby
I just can't forget about you baby

Since you kissed my lips so sweetly
Changed my life so completely

I've stopped going to the places we used to go
When they play your favorite song, I turn off the radio
And even though I've taken all your pictures down
The memory of you in my heart is still so profound

That I just can't forget about you baby
I just can't forget about you baby

Since you kissed my lips so sweetly
Changed my life so completely

When people ask me, "Just where did the fire go?"
I just smile and say "I really don't know"

I just can't forget about you baby
I just can't forget about you baby

I tried to fool everybody else
But there ain't no way to fool myself

I just can't forget about you baby
I just can't forget about you baby...
