What happens when life breaks down
When there is systemic contradiction

My name symbolized all that was corrupt to society
His name symbolized all that was pure
And I was being held in the embrace of a man who was
pure
And these inviolable sanctities were preserved in those
ten words
And it is the desacralization of all of these that
have put us in the mess that we find ourselves

Isn't it true, alas it is much worse
A person may end up believing in anything

You know, if that human acceptance does so much for
you and me
Think of what it is when God himself puts his arms
around you and says
"Welcome home"

Isn't it true, alas it is much worse
A person may end up believing in anything

You know, if that human acceptance does so much for
you and me
Think of what it is when God himself says
"Welcome home"
