Who needs a human heart?
I want something I can jumpstart.
Who needs a human voice when you can fall asleep
to the sound of a robot.
Who needs a human touch?
You wonâ€™t even miss it much.
You will be better off if you do like we do,
And just love a machine.

I love my technology
I love my technology
I love my technology
I love my technology
Turn me on when you turn it on
Turn me on when you turn it on
Turn me on when you turn it on
Turn me on

What do you want with a human?
They never know what theyâ€™re doinâ€™.
Who needs romance when you can fall in love with
reality T.V?

I love my technology
I love my technology
I love my technology
I love my technology
Turn me on when you turn it on
Turn me on when you turn it on
Turn me on when you turn it on
Turn me on when you turn it on
Turn me on when you turn it on
Turn me on when you turn it on
Turn me on when you turn it on
Turn me on

This world canâ€™t show me nothinâ€™,
Without the touch of a button.
Give me a password now and I will dial you in and
play inside your mind!

I love my technology

I love my technology
I love my technology
I love my technology

Text me you love me
Text me how much you care
Text me you love me

I love my technology
I love my technology
I love my technology
I love my technology
Turn me on when you turn it on
Turn me on when you turn it on
Turn me on when you turn it on
Turn me on when you turn it on
Turn me on when you turn it on
Turn me on when you turn it on
Turn me on when you turn it on
Turn me on
