I won't say too much to you
The dream we've had is not coming true
Our luck is running out of time
And every word is a bullet now

Together you and i have nothing left to carry on

Give me something else than this
I'm locked in this uneasiness
I'm not the act you've made me play
Somehow your queen will fade away

Together you and i have nothing left to carry on
No drug, no dream to kill this mighty storm

I'll turn my head and wash away
The thing we've had, the world we've made
Time won't be our medicine
We've got to live with ourselves again

Together you and i have nothing left to carry on
No drug, no dream to kill this mighty storm

The harder you try, the more you lose,
Stop fooling yourself again
The harder you try, the more you lose,
Stop fooling yourself again

Together you and i have nothing left to carry on
No drug, no dream to kill this mighty storm

Together you and i have nothing left to carry on
No drug, no dream to kill this mighty storm
