

6 Gig "Built For It"

Visit "[Built For It](#)" on MotoLyrics.com

Need for one more mode shift,
slip in one more stick shift.
Pack your bags and burn the flag,
more or less the same black.
Pack your bags and burn the flag,
more or less the same black.
You push it in then you pull it out,
you lift the lid and watch it spill out.
She was built for it.
We were made for this.
Used up another chance.
We seem the same but don't understand.
I know you better than you think,
but I just won't think about it.
I watch you pack your bags and then run away,
pack your bags and then run away,
you run away.
You push it in then you pull it out,
you lift the lid and watch it spill out.
She was built for it.
And we were made for this.
Used up another chance.
We seem the same...
I'll stay here alone, and pretend to be happy.
I'll stay here alone, and pretend to be happy.
I'll stay here alone, and pretend to be happy,
and pretend to be happy,
and pretend to be happy.
She was built for it.
We were made for this.
Used up another chance.
We seem the same.
We don't understand.
She was built for it.
We were made for this.
Used up another chance.
We seem the same but don't understand.
