"Lover Come In"

Head on through these warning signs
Love me, cheat me, waste my time
Slightly there but most impaired quickly
Be on home, I crawled on home
Heated touch my blood runs cold
A memory crawls across your skin
Lover come over, lover come in
Can't we remove your second skin
My shame at door where you came in
Lied and open honest words
Surely now I know you've heard
Silently I've portait these things, ah baby
Now you smile through the breeze
With a flare in your teeth
Lover come over, lover come in
Lover come lie here, lover let's sin
Can't we remove your second skin
My shame at door where you came in
Is it hell where I faltered, for it ends
Take this too truly under skin
Faint resistance broken down
Choices made in time I found
Like a blade that breaks the skin
Lover come over, lover come in
Lover come over, lover come in
Lover come lie here, lover let's sin
Can't we remove your second skin
My shame at door where you came in
Is it here that I faltered, for it ends
Take this too truly under skin
