Last time I saw Joe we were smoking cigarettes
on my front step, reciting Roger Miller
and boasting in this free-spirited time
but where did it go and what would we do,
when everything's said and everything's true?

Ooooooooooooooooooooo

I spent my time weaving my way
into your space
and now it's time to unravel it
and to start again to unravel it
but where would it go and what would we do,
when everything's said and everything's true?
everything's true.

Ooooooooooooooooooooo

Well I could just do as you wish
I could take it all back
I could take all of the magic that I left here,
I left here with you, with you,
but where would it go and what would we do,
when everything's said and then everything's true?
everything's true.

Ooooooooooooooooooooo

Our street(?). It's getting late and I see your face
I'm keeping you here, so gentle with me
O gentle with me, so gentle with me,
but where would we go and what would we do
when everything's said and everything's true?
everything's true.

Ooooooooooooooooooooooooooooo
