Take your border, push it back,  
Well I didn't see the edge or see your smile crack,  
The future would be beautiful without you,  
The words you whisper in my ear they all revolve  
around you?

Chorus

Sky high show me sky high,  
Catch a glimpse we're together in the fading light,  
Fly so high that forever your out of sight,  
Feed the hunger cos you feel that it's right now

Verse 2

Turn me round I'm looking thru your eyes,  
Well I'd walk the coal's to see your sunrise,  
The future would be lonelier without you,  
The sounds I see about me now they all revolve around  
you...

Chorus

Sky high show me sky high,  
Catch a glimpse we're together in the fading light,  
Fly so high that forever your out of sight,  
Feed the hunger cos you feel that it's right now
