"The Apple Cider Song"

Visit "[The Apple Cider Song](#)" on MotoLyrics.com

The cool autumn breeze whispers playfully warm sun
on my
Face warms me from the inside leaves gracefully
falling
To the ground colors all around me delight in my eyes
Apple cider drink smell of fires burning remind me of
the
Time when changes you bring you make all things new
sweet
Smell of spring hear the birds sing flowers bloom

Everywhere rain falls down sun so pure and bright
dances
On the lake peace fills my life as I sit on grass of
Greenest green air is fresh and clean seems like
heaven
Came down to rest here with me * you make things
Beautiful
