[Andi Deris]

Once was written down a form  
On a dark day it was torn  
It was lost and never found  
And there were rumours of cure  
A magic crown could make hearts pure  
But it was lost and never found

Shadows are falling  
Falling on and on  
Shadows are falling  
Shadows hide the crown

Long forgotten tales have told  
A crown changing stone to gold  
It was lost and never found  
Wise men said "Hate" stands for stone  
So the meaning had been known

But it was lost and never found  
Shadows are falling  
Falling on and on  
Shadows are falling  
Shadows hide the crown

I wanna know what makes the world to go

Shadows are falling  
Falling on and on  
Shadows are falling  
Shadows hide the crown

And the days will come and go  
And the time will come to show  
But it is lost and never found
