Fade away Angel Ice  
Don't let your love disappear  
You've been walking around for a very long time  
I want you to stay

But you're on the way to the sky now  
By the golden gate  
But first you must give me one more thing  
A dance on gin and juice

Please stay with me tonight  
Let's melt together in the pines  
I've been watching your eyes for a very long time  
I want you to stay

But you're on the way to the sky now  
By the golden gate  
But first you must give me one more thing  
A dance on gin and juice
