

Caligola

"Rising Sun"

Visit "[Rising Sun](#)" on MotoLyrics.com

Say Caligola, have no fear
We are amongst you back from space
Back to earth

You never know, you never feel the thrill of diving into
angel eyes
Until you try
When you do, you're never ever going back
Don't let her down

And when you find yourself alone deep in the ocean,
deep behind blue eyes
Don't let her down
Feels like I can hear the voice inside
Don't let her down

Blinded by the rising sun
We follow it down
Lights are gonna guide us home
We follow we follow it down
We follow we follow we follow it down
We follow we follow we're gonna follow it down

If you love your girl don't you bring 'em round them
boys here
If you love your girl don't you bring 'em round them
boys here

Once you will go on very long without a head of hope to
guide us through
Follow me down
Listen to your heartbeat pumping
Follow me down

[Lazee]

If you love your girl don't you bring 'em round them
boys here

Blinded by the rising sun
We follow her down

Lights are gonna guide us home
We follow we follow her down
We follow we follow we follow her down
We follow we follow we're gonna follow her down

She takes you by the hand she walks through the
crowded
fields like you're the only one
Follow her down
Listen to your heartbeat pumping
Follow her down

Blinded by the rising sun
We follow her down
Lights are gonna guide us home
We follow we follow her down
We follow we follow we follow her down
We follow we follow we're gonna follow her down
