He's got a dirty mind
Just don't know what you're gonna find

On her way from the school
On her way from the school
She saw him, she saw him
In a second she knew
In a second she knew
She wanted him, oh, she wanted him

There was no trace on him
There was no trace on him
Of filth, grime or dirt
An overwhelming urge
An overwhelming urge
To smile, laugh and flirt

There she goes with a twinkle in her eye
Don't take a genius to understand the reason why
There she goes with a twinkle in her eye
Don't take a genius to understand the reason why

He's got a dirty mind
Just don't know what you're gonna find

This girl, she thought she was
This girl, she thought she was
Living in a dream
It's just that he was
It's just that he was
Exceptionally clean

All the boys that she
That she had known before
Avoided hygiene
Around, at his house
You could eat off the floor
Which was slightly unnerving

Hygiene boy, oh, what am I to do?
I feel positively filthy standing next to you
Hygiene boy, oh, what am I to do?

I feel positively filthy standing next to you

He's got a dirty mind
Just don't know what you're gonna find

She got to know his mind
She got to know his mind
Intimately
She was surprised to find
She was surprised to find
Something of an anomaly

You see this perfect boy
You see this perfect boy
Wasn't quite so pristine
He had ideas that would
He had ideas that would
Make the devil scream

Dirty mind
Don't know what you're gonna find
He's got a dirty mind
Just don't know what you're gonna find

Dirty mind
Don't know what you're gonna find
He's got a dirty mind
Just don't know what you're gonna find

Dirty mind
Don't know what you're gonna find
He's got a dirty mind
Just don't know what you're gonna find

Dirty mind
Don't know what you're gonna find
He's got a dirty mind
Just don't know what you're gonna find
