Without you I would never write this song  
Without you I were not sure  
About all these right and wrongs  
And in your eyes I can see what truth can be  
And your words I find myself  
And your kisses seem to cast a spell on me

Chorus:

Find it all in one  
The sweetest taste of purity  
I waited for so long  
Waited in believe of better days to come  
I cherrish your ideas, your thoughts  
Your smile that makes me strong  
I cherrish what you are

Without you I would miss something somehow  
Without you I were alone  
Not as happy as I'm now  
But you re there and I'd like you thank you for  
Your decision to attempt and to dare  
To take risk for something more

Hi it's me  
And this time we should give in  
Yes, it's cause  
And these moments we forgot to feel it  
Watch you heading for this life  
Why can't you breaking in these substitutes  
Your world looked the same through all this time  
And there s nothing to retrieve
