Indicate your own defeat
Your stomach lying on the street
Conjure up the body heat
And put it in the drivers' seat
Bleed your name across the mind
And let the situation rhyme
Starve the matter from the brain
And let the instigator reign

Human beings more alike
You just wanna see the light
The vision of the other side
The demon with an appetite
The journey that will operate
To feed upon the devil's plate
Feel the coral in the sand
Spanish dancer in my hand

Tell me that you need it
Tell me that you need it
Tell me that you need it now
Tell me that you'll eat, feed it, breathe it
seed it, grieve it just to make it proud
You tell me you want to scream
But you don't want to make a sound
Tell me that you need it
Tell me that you need it
Tell me that you need it now now

Your attendance I accuse
Your silent mind I can't refuse
Anatomy I would diffuse
Instinctively has me confused
Suddenly the parasite
Chews inside the sweet delight
Insecure it will bring
Making love to everything
