"Surface"

Gonna try and use the same full moon that you do
Gonna try and make this all just go away
Gonna spread out all the innocence of what I knew
As you take the silent songbird with you on your way

"By now this should be getting pretty easy",
said the optimist, before she slipped alone
Like the summer days we no longer own

Chorus

One of us is on our way
Only living for today
About to break away
It's all right in front of you
It can happen if you want it to
For those who want to play, find your own way

Challenged at the thought of ways to please you
I am an ocean now looking up from below
Leaving surface waves and ripples up there on their
own

Chorus
