"Close Your Eyes"

I see stars above me
but the sky is fair
When will I catch this sunrise
I can wear it anywhere
I'd like to take you with me
to steal the moon
then we could bring it back
to brighten up my best friends room

CHORUS:

Close your eyes
let me take you to the sun
burning slowly
held together in the sky

I want to find a rainbow
and paint it black
It's like this satellite
that landed here this afternoon

CHORUS 2X

There is nothing miss that you can place
nothing broke that you can save
nothing wound that you can heal
