I want to be the one  
To say that I found you safe  
And held you in my arms  
I want anyone else in the world  
To tell me  
That they did too  
And took you home

Across the field and to your door  
And said, hey baby it's cool,  
There's no reason to be scared anymore.  
Took you home  
And held you in, held you in, held you in.

Just stay home  
Don't come outside to play  
Circumstance beyond control  
I feel so helpless  
Mind is racing and breaking  
Me in to a million pieces

Because I can't

Take you home  
Across the river and to your door  
Take you home and  
Cut through the darkness  
You don't have to cry anymore  
Take you home  
And hold you in, hold you in, hold you in.

Take you home  
Across the sea and to your door  
Take you home  
But I'm so scared  
That home isn't here anymore  
Take you home  
And hold you in  
Through the nightshade and under the stars  
And hold you in...
