I.  
It's another day  
It's another way to nowhere  
And now you're gone  
There's nothing but the emptiness  
So I hide  
Deep into the crowd  
And walk away  
And I walk away into another day  
Chours:  
Another love  
Another faith  
Another wound  
Another hate  
II  
It's another night  
I dream about someone far away  
Another pain  
I can not stand it any more  
Another love  
You fall into oblivion  
And I walk away from pain  
I turn around from another day  
Chorus:  
Another love  
Another faith  
Another wound  
Another hate  
  
You fall! You fall into oblivion!  
I fall! I fall into oblivion!  
We fall! We fall into oblivion!  
Chorus:  
Another love  
Another faith  
Another wound  
Another hate
