I can't believe it

It happens each day.

It's ill conceived

Just throw it away.

To watch the waiting

Time slippin' away

It won't be long now.

I hold the moment

The hour's sublime

It's hard believing

Dancing with time

Just watch the waves

Time slippin' away

It won't be long now.

Down at the landing where the boats come in

People stand in line.

Close by the water where the fishes swim

Round and round to pass the time.

But you know They're gonna get there

Around and round it's gonna spin.

Out at the airport where the planes come in

People buzzing like flies.

Out at the airport where the planes come in,

See the hours go flashing by.

But you know They're gonna get there

Around and round it's gonna spin.

Down at the station where the trains come in

Never make it on time.

Down at the station where the trains come in

See my friends all walk the line.

But you know They're gonna get there

Around and round it's gonna spin.

View it all with suspicion, view it all and despise.

View it all with suspicion, view it all with my eyes
